

Cadogan Petroleum sponsored construction of sports facilities for people with disabilities

Cadogan Petroleum is pleased to announce it has sponsored the construction of a mini-football field with artificial turf for use in the Rehabilitation and Sport Center for disabled people in Ukraine. The center is in Yavoriv village, located within the Company's Bitlyanska license, and is the training center for the Ukrainian national Paralympic team.

Cadogan's sponsorship of the field reflects its commitment to the region, including its support for equal opportunities for all citizens. Sport is a way to help people with disabilities to gain self-confidence, while providing them with better opportunities to socialize and recover.

The field was inaugurated by a cross-border football match between the Ukrainian and Polish teams, played in the context of "good neighborhood relations, regional stability and mutual cooperation". This event promotes cross border co-operation between the two countries and was attended by the Chairman of L'viv Regional Council, amongst others. Cadogan was represented by its CEO, Guido Michelotti, its General Director, Andrey Belyi, and its L'viv District Manager, Andriy Levytskyi.

In his address to the participants, Mr Michelotti said that Cadogan was proud to be part of an event which represented an important milestone in the journey of Ukraine towards the European Union.
